

*I'm excited to be providing this group buy for everyone! Please read the following information –*

*It should answer most (if not all) of your questions.*

WHAT IS THIS GROUP BUY FOR?

This group buy is for those wanting to purchase homeopathic nosodes obtained through a much respected and trusted Naturopathic Doctor whom is a good friend of mine.

She informed me that there are some health specialists who sell these remedies in a combined form but, through her 20+ years' experience in this field, she has found that it is much more effective to "vax" someone using homeopathic remedies one remedy at a time. Challenging the body to one remedy at a time has proven to be more effective than doing all vax remedies at once.

*(Please see "Dosage Recommendations" for more info.)*

*Note: The Measles remedy is a homeopathic nosode for both Measles and Rubella.*

Listed in Order of Importance (according to ND)

**Measles (Rubeola) & Rubella (German Measles)**

**Pertussis (Whooping Cough)**

**Mumps**

**Polio**

**Smallpox**

**Diphtheria**

**Tetanus**

**Chicken Pox**

Each remedy is in liquid form. Each bottle contains over 750-800 drops.

The "vax" dosage regimen, for one person, totals approx. 80 drops.

**Each bottle has enough to "vax" up to 9 kids!**

**1 bottle is \$19.50 (+ Shipping)**

**ORDERS NEED TO BE IN BY WEDNESDAY, June 7th.**

*Disclaimer: The information in this document is for information purposes only. It is not to be used as medical advice or to treat or diagnose a disease. There is no guarantee to the outcome of any of these remedies. Please visit a health professional for any health concerns you may have.*

## INFORMATION:

Homeopathic “vax” remedies can be used to either “vax” a person or child against the specific illness it was formulated for or it can also be used for an active infection. (*See dosages below.*)

There have been no double blind studies done to prove the efficacy of these nosode homeopathic remedies. However, Samuel Hahnemann proved that this method works over 200 years ago.

There are no guarantees. However, the doctor whom we’re getting this remedy from informed me that they have seen less people come in to their office who have used this method than those who have been vaccinated - with an active infection of what they had been vaccinated for.

***(Please see “Extra Info from Clinic” down below for more info.)***

## SIDE NOTE:

The ND giving us this deal told me that they have been seeing both Pertussis and Mumps (and Measles) around lately and therefore suggest getting those first before considering the others.

## IS THIS A NOSODE OR HOMEOPATHIC REMEDY?

This homeopathic solution actually is a *nosode*. Unlike a regular homeopathic remedy where the formulation of it starts out with a compound like a plant or a mineral, that has been diluted down to the point where none of those substances remain in the solution, they, instead, start with a diseased tissue which is then diluted down to the point where none of the infected tissue remains in the solution but the energy of it remains which works with our vital force and stimulates our immune system to kick out that same illness / set of symptoms found in or created by the infected tissue or have a better response to the disease if we use the remedy as a preventative measure.

This formula challenges the body – even with the compound being almost obsolete – and creates an immune response. Once an illness comes around that a person has been homeopathically “vaxed” against it – the body recognizes it and has an immunity against it.

The body recognizes it in homeopathic form and has an immune response to the illness without any ill side effects.

## PRODUCT NAME & INGREDIENTS for MEASLES REMEDY:

Mediral International, Morbilinum. 60% alcohol + Morbilinum (nosodes of the measles)

All other remedies are also from Mediral International and contain nosodes of the illness they’re meant for.

## WILL I NEED TO REPEAT THE DOSAGE REGIMEN?

The “vax” dosage regimen only needs to be done **once in a lifetime**. It can be repeated, however, in 5 years if there is an illness going around that you’re concerned about.

## DOSAGE RECOMMENDATIONS:

Homeopathic nosode remedies are most effective if you administer **one remedy at a time**. The ND I get these from suggests that **if you choose to give more than one vax remedy at a time - only do so for children over 6 years of age**. Vax remedies can be overlapped with another remedy while the remedy before it is being administered only once a month. **(See *monthly calendar example*.)**

### VAX DOSAGE:

5 drops once a day, in water, for 7 days. Then 5 drops, once a week, for 4 weeks. Then 5 drops, once a month, for 4 months.

(It totals to approximately 80 drops spread out over a 4-5 month period of time.)

### DOES IT HAVE TO BE TAKEN CONTINUOUSLY?

It doesn't have to be taken continuously in order for it to be effective. By having done this "vax" regimen – your body will have built up immunity towards the illnesses the remedy was meant for.

### DOSAGE FOR AN ACTIVE INFECTION:

5 drops 2 x day until infection is gone.

***(Please see "Regimen Example" down below.)***

## WHAT IS THE SHELF LIFE?

Indefinite. Yet, it's good to know that heat, light and radiation (microwave exposure) decreases its efficacy.

## DOES IT CAUSE SYMPTOMS / SIDE EFFECTS?

No cases of measles starting up have been reported. If person gets a rash – continue on with regular dosage.

## IS THIS EFFECTIVE FOR ADULTS / CHILDREN WHO HAVE ALREADY BEEN VACCINATED?

Yes.

## SHOULD I BE CONCERNED ABOUT THE ALCOHOL CONTENT?

If you're concerned about the alcohol content simply place the recommended dosage drops in warm water and allow to sit for 3-4 minutes. Most, if not all, of the alcohol will have evaporated.

## WHY ELSE SHOULD I HAVE THESE REMEDIES?

For me – I want these remedies not only because it helps give me peace of mind regarding my having done \*something\* safe and effective for my child to help them be better able to defend themselves against these contagious illnesses. But another reason why I'm storing them is because, through research that I've done, I know that some of these infectious

diseases (mainly measles and tetanus) are some of the main causes of death during a disaster and I want the most effective remedies on hand in order to combat those diseases in the event of a prolonged disaster.

#### WHEN SHOULD I EXPECT TO GET MY REMEDIES?

Approximately 3 weeks after I turn in the order for the remedies on **Wednesday the 7th of June, 2017**. The remedies will be drop shipped directly to my home which could take up to 2 weeks. I'll mail out the remedies within a day or two of receiving them and you should have them a few days later.

#### EXTRA INFO SENT FROM FROM CLINIC:

*"Morbillinum is the measles nosode, also known under the name rubeola or red measles. Morbillinum offers relief of measles symptoms, including skin itching, skin irritation, skin eruption with cough. Nosodes are a safe alternative without whole molecules, live or active bacteria.*

*Nosodes can be taken in preventative doses as well as for disease symptoms. Avoid harmful vaccine preservatives and noxious material. Nosodes may be used in preventative applications. Helpful for the practitioner dealing with chronic illness or vaccine damage.*

*Kathryn Jones Health Counselor advocates health rights, alternative health care and the importance of education in making informed health decisions.*

*Nosodes are safe homeopathic vibrational preparations of viral or bacterial substances. There are no whole molecules of the actual substance in 30C potency. Nosodes are therefore so much safer than vaccines and injection of foreign material into the blood stream.*

*Homeopathy has had an opportunity to prove its effectiveness in times of epidemics and contagious diseases. For example, during the cholera epidemics in Europe during the 1830's, homeopathic doctors had a recovery of 80% of their patients. Whereas, Conventional doctors had a 50% recovery rate.*

*The father of Homeopathy, Samuel "Hahnemann, was the first man to conceive that the products of disease could be used in the cure of diseases. His preparation, Psorinum, was the first vaccine to be made" (from T.T.M. Dishington, 1928. Dorothy Shepherd in the book, More Magic of the Minimum Dose, writes, "What do homoeopaths want immunizing substances for? We have got much better agents which have been used clinically and proved many years before immunization was even thought of. We call them nosodes."*
